

I would like to request that the FCC reconsider their potential action of expanding the LPFM service in my area as that action will more than likely allow other radio stations to take priority over a current FM translator service in which I listen to a special radio station on 96.1 FM - K-LOVE.

Unfortunately, there are very few radio stations like K-LOVE in existence in which to listen in this area. And because of its basis and purpose, it is a station that anyone, at any age can tune to and enjoy. K-LOVE has a positive and encouraging impact on this community by offering wholesome values and family-friendly programming. I cannot imagine that an LPFM radio station would offer the same. This format of programming is in demand in this community.

Since we currently have access to this style of programming, I would ask again that the FCC reconsider their expansion plan in order that we here in this community can continue to listen to our favorite programming. K-LOVE DOES make a difference!
